Subject: Semiannual Report No. 1  
First Half 2010 Full-Scale SVE System  
Boeing Real Property Management  
Former C-6 Facility, Building 1/36 Area  
Los Angeles, California

Dear Mr. Scott:

Haley & Aldrich, Inc., prepared this letter report to summarize the first half 2010 soil vapor extraction system (SVE) activities at the Former C-6 Facility, Building 1/36 Area in Los Angeles, California (Site). This letter report was prepared in response to the Los Angeles Regional Water Quality Control Board's (LARWQCB) reporting requirements and is being submitted in lieu of a full semiannual report because the SVE system was not operated during the first half of 2010.

Full-scale SVE operations were discontinued in September 2009 so that soil vapor sampling could be conducted to evaluate offgassing from the groundwater table and the associated vapor migration through the soil column, as well as to evaluate closure for the Building 1/36 SVE system. These sampling activities are still in progress. Considering that SVE was discontinued, the LARWQCB approved a reduction in reporting frequency from quarterly to semiannual on 16 February 2010; this is the first semiannual report. Future operation of the SVE system will depend on the results from the soil vapor sampling activities. In the event that the SVE system is restarted, the reporting frequency would return to quarterly.

We appreciate the opportunity to provide environmental consulting/engineering services on this project. Please do not hesitate to call if you have any questions or comments.

Sincerely yours,  
HALEY & ALDRICH, INC.
